FEBRUARY 2026

NEW YEAR, NEW CHANCES

We are starting this new year stronger than ever. With new equipment, new partners, and the lasting impact of all the dedicated volunteers who were part of Grow Ghana in 2025. We look ahead to even more new opportunities, new ideas and new chances to grow together and we are ready to take them in 2026!

Goodbye... REBA AND LEMA

We say farewell to two of our volunteers. Thank you for your valuable support and commitment to Grow Ghana. Your contributions from the Christmas vouchers to the football tournament and all of your other innovative ideas, have made a meaningful difference.

SCIENCE FAIR AT VISION SCHOOL

Thanks to our partner the vision school Grow Ghana was able to host a stand at their science fair.

There the kids were able to present what they have already learned in our lessons. Not only the scratch projects but also working with the Mbots, giving other students and parents the opportunity to get an inside of Grow Ghanas Saturdays lessons at Vision School.

Graduation AT NOVASTAR ACADEMY

In December, we proudly hosted a graduation ceremony in collaboration with Novastar Academy, marking the successful completion of our Scratch coding program.

During the ceremony, each student had the opportunity to present one of their individual projects, showcasing the skills, creativity, and problem-solving abilities they developed throughout the course. The presentations highlighted not only their technical progress but also their confidence in explaining and demonstrating their ideas. At the end of the ceremony, all students were awarded their official coding certificates, celebrating their dedication and hard work over the past months. With the Scratch lessons now successfully completed, we are excited to take the next step in our educational journey.

We look forward to exploring the world of robotics together with our students, as we begin hands-on robotics sessions every Saturday at Novastar Academy. This new phase will allow our students to deepen their understanding of technology through practical experimentation and collaborative learning.

FIND GROW GHANA ON WHATSAPP NOW!

We opened a WhatsApp Channel, so you won't miss out anything! To keep you updated, join it now due this link:

FOOTBALL TOURNAMENT

Right now Grow Ghana is working on opening a football team. That is why we got to host a football tournament on the Kokrobite pitch. Part of the tournament were three of the schools we teach during the week. We had the girls and boys playing from L-school, K-school and Arise. Ending up with L-Scholl as the final winner !

Graduation at The Vision School

In December, we celebrated a fantastic Electronics Graduation at the Vision School. We are incredibly proud of our students for their dedication and the impressive technical skills they have mastered.

Building on this success, we are excited to push further this year as we begin our Advanced Scratch curriculum. We can't wait to see what our students will create next as they level up their coding skills!

GIVING TUESDAY

This past Giving Tuesday, we joined the global movement of generosity, and once again, you blew us away. We are incredibly grateful for every single donation, share, and message of support we received. In a world with so many needs, your choice to invest in the future of our students and our project means everything to us.

Your impact:

Every Euro/Dollar donated goes directly toward new equipment, ensuring that our mission continues to grow and thrive.

Thank you for standing with us and for proving that together, we can create lasting change.

CHRISTMAS CELEBRATION AT GROW GHANA

Before the team was going on break we had a Christmas celebration in the office. We spent the day strengthening our bonds by cooking a traditional Jollof meal together and sharing gifts as a token of our appreciation for one another.

Looking back on the past year, we are incredibly grateful for the growth we have achieved and the dedication of our team.

OUR FIRST CHRISTMAS CALENDAR

This December, we opened our doors wider than ever before with our first-ever Instagram Advent Calendar. We are absolutely overwhelmed by the love and engagement you showed us!

Through 24 days of posts and stories, you got an exclusive look at:

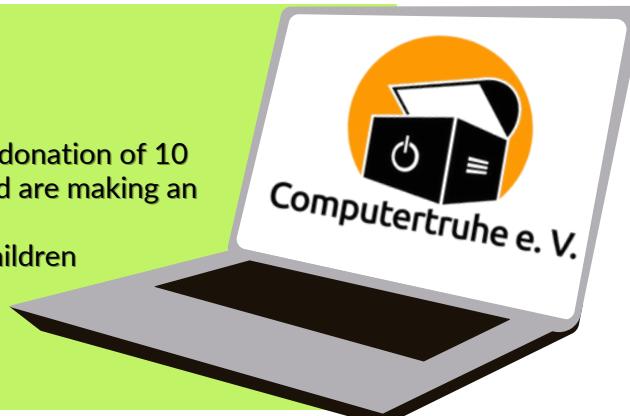

- The Team: The faces and hearts driving Grow Ghana forward.
- Daily Life: Our authentic, day-to-day work on the ground.
- The Kids: The dreams and goals that motivate our students every day.

We heard you loud and clear: you loved getting to know the people and stories behind the project. Thank you for your support and for being such an active part of our community!

THANK YOU COMPUTERTRUHE E. V.

We are incredibly grateful to Computertruhe e.V. for their generous donation of 10 laptops. The first three devices have already arrived at our center and are making an immediate difference.

This support significantly enhances our teaching, as it allows more children to work on their own individual laptop. Having this direct access speeds up their learning process and makes our IT lessons far more effective. Thank you for empowering the next generation!

ALWAYS BE REMEMBERED...

As December approaches, our hearts are heavy with a significant anniversary. This month marks one year since we lost Darius, who was a truly remarkable soul.

It is still difficult to find the right words to describe the void left behind. Darius was far too young when he was taken from us, a fact that remains heartbreakingly impossible to change. However, while we cannot undo the past, we can choose how we carry their spirit into the future.

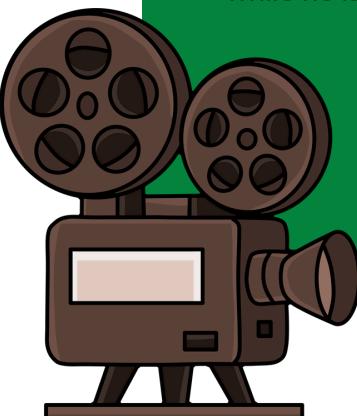

A MOVIE NIGHT FOR DARIUS

To honor his memory, we recently dedicated a special Movie Night in December.

This movie night was different. It was not about the movie itself but about remembering Darius and his time here, that is why we settled into a profound minute of silence together with the kids. Surrounded by the warmth of flickering candles, we stood together to remember his kindness and his dedication. Seeing our students hold those lights was a powerful reminder: while he is no longer with us, the light he brought to

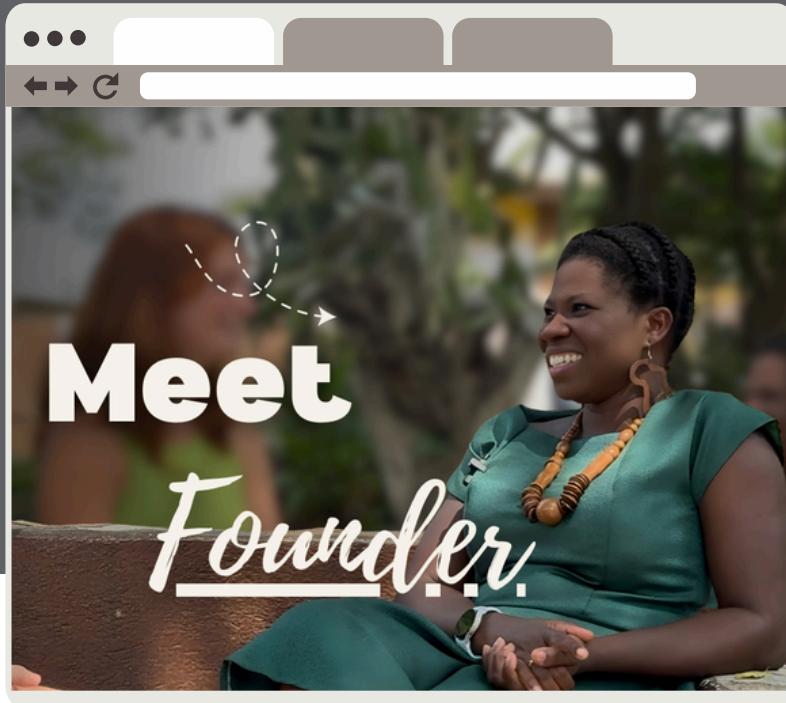

Grow Ghana is impossible to extinguish.
